

HARRY CUMMINGS AND ASSOCIATES INC.  
ARE PLEASED TO INVITE YOU AND YOUR ORGANIZATION TO A

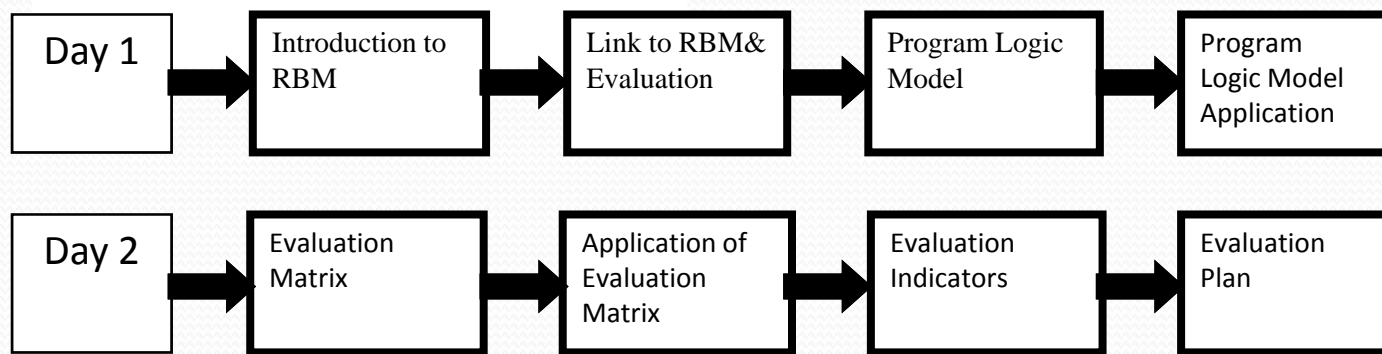

## TWO DAY RESULTS BASED MANAGEMENT AND EVALUATION TRAINING

### Benefits of Evaluation

Evaluation is a form of analysis that helps managers make decisions about current or future projects, programs and initiatives. The results of an evaluation can help you determine how well projects are working and identify reasons for success or failure. Evaluation is used to assess the efficiency and effectiveness of programs, a key requirement of government agencies. Results based management (RBM) and evaluation approach is the leading approach for the resources, inputs, activities, outputs and outcomes of a program. Indicators help to determine project success.

### The Workshop

This workshop is designed to help participants develop a systematic approach to evaluation and gain transferable skills. On the first day, they will engage in an active and participatory learning process to examine Results Chain and Program Logic Model approaches. Small group discussions of relevant case studies will serve to strengthen skills that can be applied in the workplace. During the second day the workshop will cover the evaluation matrix, indicators and evaluation planning.

Instructors: Dr. Harry Cummings, Professor, School of Environmental Design & Rural Development, University of Guelph and Director of Harry Cummings and Associates Inc.; assistance from the HCA team.
